

Dear Valued Customer,

We want to keep you informed about recent changes affecting freight costs.

Over the past few weeks, fuel prices, particularly diesel, have increased significantly, impacting transportation costs across the industry. For reference, current pricing trends can be viewed here: <https://www.eia.gov/petroleum/gasdiesel/>

To help manage these increases, we will be implementing a temporary fuel surcharge of \$75 per truck, effective immediately. This reflects only a portion of the added costs.

We are monitoring the situation closely and will adjust or remove this surcharge as things progress. Any updates will be communicated in advance.

We appreciate your continued business and support.
